

EMPLOYMENT

Frontend Developer Angular	Itech101.global	Nov 2019 - Present
-----------------------------------	------------------------	---------------------------

- Currently, I am working as a junior Angular developer and I am fully responsible for developing frontend applications using Angular/Typescript best practices with REST APIs services. I am also responsible for maintaining the staging and production deployment and release accordingly.
- Technologies: Angular, Typescript, JavaScript, Bootstrap, REST APIs, ng-zorro, material design.

Angular Developer	Texas Imaginology	Aug 2018 - Oct 2019
--------------------------	--------------------------	----------------------------

- I joined as an Intern where I learned the basics of Angular, Typescript, Javascript, software development models and industrial experiences in the software development fields.
- Was able to finish the given task on time. Hence became a part of the core team members of the MIS system. The task was to improve the functionality of the existing system, integrate REST APIs, and prepare for deployment and release accordingly using Filezilla.
- Technologies used: Angular, Javascript, JQuery, Bootstrap, Java REST APIs.

LANGUAGES AND TECHNOLOGIES

- Programming Languages - TypeScript, JavaScript, Java (Basic)
- Operating System - Windows, Android
- Database - MySQL (Basic)
- Frameworks and tools - Angular, Ionic, SpringBoot (Basic), Webstorm, Eclipse
- Others - Bitbucket, Git (Version Control)
